

Cargo Hold Application Set

Description

CLEANING & ENGINEERED EQUIPMENT

Product Code: 520001

HIGH-EFFICIENCY, LOW-PRESSURE, PLUG-AND-PLAY SPRAYER TO ACCELERATE CLEANING AND CARGO TURNOVER

Apply any Cargo Hold Cleaning Chemical or HoldShield Protective Coatings using our specially designed Application Set, made for easy use by crew. It works with all protective coatings and for low-pressure application of chemical solutions to clean cargo hold tanks. It is also perfect for final cleaning steps, including rinsing with fresh or sea water. The set includes a chemical resistant air-operated double diaphragm pump and an 8m telescopic applicator lance.

New Age Chemicals offers full range of accessories and spare parts.

CHARACTERISTICS

- High-efficiency, low-pressure sprayer
- Plug-and-play system, includes all fittings
- Resistant to chemicals, acidic and caustic materials
- Spray on out-of-reach parts
- Chemical resistant double diaphragm pump, protected in stainless steel frame with handle
- Accelerates cleaning and cargo turnover
- Available with the lightest (only 3.9 kg) telescopic lance & can be also used at high pressures up to 300 bar when connected to a high pressure cleaner
