

Electric Submersible Pump

Description

CLEANING & ENGINEERED EQUIPMENT

Product Code: 580001

PROFESSIONAL 2-INCH, 3x440V/60Hz SUBMERSIBLE PUMP, FOR DEWATERING, DRAINAGE, LIQUID HANDLING, AND CARGO HOLDS DRAINING AFTER CLEANING

Efficient and reliable, our Electric Submersible Pumps are designed for high-performance fluid transfer in challenging conditions. Ideal for dewatering, drainage, and liquid handling, these pumps provide powerful operation while minimizing energy consumption. Durable, compact, and easy to use, they ensure smooth operation in marine, industrial, and construction environments.

Air-operated Submersible Pump also available.

CHARACTERISTICS

- Professional Submersible pump 2 inches
- For dewatering, drainage, liquid handling and cargo holds draining after cleaning
- Resistant to chemical/water solutions used while rinsing the holds
- High head discharge; max. 30 meters height
- Suction can handle solids of max. 11mm diameter
- Equipped with auto thermal cut-off for motor protection, silicon carbide double mechanical seal, epoxy cable base treatment
- Operates at 3-phase 440V/60Hz (other voltage versions available upon request)
